

Electronic Bill Payment for Legacy CIS Software

Electronic Bill Payment (EBP) gives your customers the flexibility of paying online and saves you money by reducing the manual process of handling payments.

How it works

EBP provides access to account information for all applicable services. From a web browser, your customer enters their customer-location number from their bill. They can view or pay their bills using a credit card. Once complete, a confirmation screen will be displayed.

Current Account Status

Current Status	
KLEIN REALTY CO 1 - 2	
Address	950 S WINDER PARK DR
Amount

Legacy Integration

Automatically updates legacy system with payment history.

Benefits

Account information is always up-to-date. Customers have access to information 24 hours a day minimizing billing support calls.

Manage cash more effectively. With Electronic Bill Payment (EBP), funds are available immediately reducing bill collection efforts.

Seamless integration to legacy systems. The EBP solution acts as a "front end" to legacy CIS systems, such as third party utility billing software. With an interfaces to legacy cash receipts, utility billing and accounting systems, EBP makes online bill payments available.

An open architecture design offers platform independence. EBP can run on any web server platform minimizing your server investment.
