

Using your business applications to help you more efficiently and effectively manage your government agency is now easier than ever. Innoprise has partnered with IBM Smart Business to provide government officials with a new and complete software and hardware solution resulting in unprecedented simplicity and savings of your time and money. Innoprise ERP software is preloaded onto IBM's Smart Cube servers to provide a total integration of your business application, hardware, operating system and database software.

### The Smarter Solution

Innoprise Smart Solution provides a new and easier way for government officials to finally implement and operate ERP applications in a manner that enables you to run your agencies the way you want to. You eliminate all of the problems caused by the complicated, costly and limited capabilities of separately designed hardware, operating systems and database software.

### ERP Software

Innoprise ERP applications are designed to grow with your business needs by removing the bottlenecks created by outdated legacy systems and manual processes. The open architecture, flexible design and robust functionality allow government officials to reduce their cost of service, streamline operations and improve productivity. With Innoprise applications, users across departments can search, sort, analyze and print needed information instantly.

### IBM Smart Cube Server Platform

Smart Cube is an integrated and automated "appliance like" system that is preloaded with the operating system, database and application servers, firewall protection, backup and recovery.

### Smart Desk

Once you're up and running, you can manage your Smart Applications through the Smart Desk—a comprehensive dashboard that streamlines the ongoing maintenance of your applications, whether it's automatically updating applications or allowing you to apply features on demand.

#### Financial Management

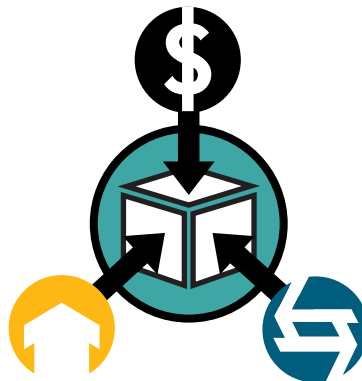

Finance, Human Resources, Payroll

#### Community Development

Permits, Code Enforcement, Planning and Zoning

#### Customer Information System

Utility Billing Systems and Accounting

### Benefits

IBM Smart Business makes it easy to acquire an integrated and complete hardware and software application solution, saving you significant IT and procurement staff expenses.

Everything works together from day one! You get your IBM hardware and Innoprise business applications up and running immediately, reducing complexity and disruption to your operations.

These pre-bundled solutions save you time reconfiguring servers and networks, and save you money by eliminating most costs required to install, configure and tune your business applications.

The IBM Smart Desk monitors the IBM Smart Cube and provides updates of the IBM software and hardware as well as the Innoprise solutions.

Your Smart Solution can be supported with your existing IT staff backed by both IBM and Innoprise professionals.
